

2023 LexFarm Education Policies

Payment & Refund Policy:

- Tuition refunds are guaranteed up to 3 weeks prior to the start date of a program minus a \$10 administrative fee. Cancellations within the three weeks prior to the program are nonrefundable if the child's spot cannot be filled. If the spot can be filled, a full refund minus the \$10 administrative fee will be given.
- There will be no tuition refunds for cancellations made after a program has begun.
- No full or partial tuition refund or credit will be given for a child's failure to attend any part of a program for which they are registered
- We will do our best to adapt our programs to the weather and reschedule any weather-related program cancellations. In the event that we must cancel a program and we are unable to reschedule, that day's portion of program tuition will be refunded.

Student Safety Policy:

- The safety and well-being of your child is our utmost concern. Outdoor education on a working farm involves learning and playing in a dynamic environment. For their safety, children are prohibited from touching farm equipment and implements. We will monitor weather closely and cancel in advance if there is a likely risk of thunderstorms, heavy rain, or if temperatures become too high or low for student safety. If your child has trouble staying with the group or following teacher directions as they relate to safety, staff may ask that the child attend the program with a caregiver's assistance.
- Children in preschool and school age programs will not be required to wear masks at this time. Parents or caregivers may require their individual children to wear masks, and educators will fully support this decision.
- Educators will ensure regular hand washing, especially before snack and after interactions with farm animals.
- Please plan to keep your child home if they are sick. If they are recovering from a cold, and you are wondering whether to send them to programs, a good rule of thumb is to assess whether your child is back to their normal energy level. Our classes are active! If children are needing extra rest to recuperate they will have a hard time enjoying our activities and it's best to keep them home. Children should stay home if they have been fever free without the use of fever-reducing medications for at least 24 hours. Children should also stay home if they or anyone in the household has tested positive for COVID and should follow CDC guidelines for returning to group settings.
